

What Parents and Carers Need to Know about Live Streaming

At National Online Safety, we believe in empowering parents, carers and trusted adults with the information to hold an informed conversation about online safety with their children, should they need it. This guide focuses on one of many issues which we believe trusted adults should be aware of. Please visit www.nationalonlinesafety.com for further guides, hints and tips for adults.

What Parents & Carers Need to Know about LIVE STREAMING

Live streaming involves broadcasting and watching videos online in real time, often on social media or via platforms like YouTube and Twitch. Viewers can interact through comments, chats and reactions during the broadcast; such instant engagement makes this an exciting way to share experiences, learn from others and build digital communities. Despite the many positives, live streaming also creates a potential platform for unsuitable content and poses some risks to children. It's essential to keep privacy and safety in mind and comply with each site or app's age restrictions.

WHAT ARE THE RISKS?

LACK OF AGE VERIFICATION
Despite their age restrictions, some platforms don't require proof of age or sign up, meaning that anyone can register for an account (and potentially pretend to be older or younger than they actually are). In many cases, this means that young live streamers can never be totally certain exactly who they are broadcasting to and who is engaging with their live stream.

DISCLOSING PERSONAL INFO
A characteristic of live streaming is the ability for videos to be instantly shared worldwide. Without the correct privacy settings enabled, a child could inadvertently reveal personal information or their location, making them vulnerable to online predators or identity theft. It's wise to regularly check the privacy settings (and what data is being shared) on any apps your child has signed up for.

ANYTHING COULD HAPPEN
As the video streams are live, children might encounter (or inadvertently share) inappropriate content. Most live-streaming apps have rules to prevent this and monitor their services, also providing report buttons where content can be flagged for review. It may not be dealt with instantly, however, meaning that your child could be further exposed to harmful content during a live stream.

UNAUTHORISED RECORDINGS
Each live streaming platform stores completed videos for different periods (Twitch saves broadcasts for 60 days for example, while Facebook and YouTube remove them only at the creator's request). Deleting a video, though, doesn't always stop it from being shared. In some cases, streams have been illegally recorded (or screenshots taken) by certain viewers and redistributed on other sites.

ROGUE CONTENT CREATORS
Children can also watch other people's live streams, which could potentially contain anything at any time (such as nudity, drug use or profanity). Most apps claim to monitor live streams and will stop any that don't adhere to their guidelines – but with millions of streams per day, it's complicated to regulate them all, so children could be exposed to inappropriate content without parents knowing.

DANGER OF GROOMING
There are increasing reports of children being coerced into performing "suggestive acts" by strangers on some live-streaming apps. Due to the lack of verification required for certain apps, almost anyone can sign up to these services (including anonymously or under a false identity). It's vital, therefore, to ensure the correct safety measures are in place before your child begins live streaming.

Advice for Parents & Carers

PUT PRIVACY FIRST
Through the streaming app's settings, switch your child's account to 'private', so only their friends and followers can see their broadcasts. You could also turn off the live chat, shielding your child from any upsetting comments – although viewers' feedback is often seen as an integral part of the fun. Identify any nearby items (such as school uniforms or visible landmarks) that could give away your child's location.

MANAGE MULTISTREAMING
Some apps and sites let users stream their content through multiple social media platforms at once. A broadcast on Instagram, for example, can be shared on YouTube, Twitch, X and Facebook. If the accounts are linked, the privacy settings can differ on each of these, so we'd suggest only streaming via one platform at a time to maintain greater control over who's watching your child's videos.

GET INVOLVED YOURSELF
Research suggests a significant number of streams show a child on their own, often in a supposed safe space like their bedroom. If your child wants to live stream, ask if you could be present because you're interested in how it works. You could even set up your own account to gain a more detailed knowledge of what your child talks about in their live streams – and who they're broadcasting to.

TALK ABOUT LIVE STREAMING
Try to start with positives before discussing potential risks. You could ask which live streaming apps your child likes and how they use them. Do they just watch streams or create their own? Explain why it's unwise to reveal personal information while streaming (even to friends). If you feel your child's too young for live streams, explain your reasoning to them and perhaps agree to review this decision in the future.

CONSIDER THEIR ONLINE REPUTATION
As the broadcasts are live, it often causes the misconception among young people that whatever happens in their video simply 'vanishes' once the stream ends. However, videos can stay online indefinitely or be recorded by other users. It's important that your child understands what they do and say in a live stream could potentially damage their online reputation and, quite possibly, be seen by prospective future employers, colleges or universities.

Around one in four social media users watch other people's content in real time on those same platforms 📺📱

What's more, Ofcom estimates that 58% of children in the UK have consumed video content this way – with many also creating and broadcasting their own material online 📺

Live streaming, as it's known, has become immensely popular – with some streamers drawing tens of millions of followers. Among those viewers, however, lurk individuals who may pose a threat. This #WakeUpWednesday, find out how you can help to protect young live streamers.
